Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. Continuation of 11. does NOT place the application in condition for allowance because: The applicant states that Dehnert does not disclose object files that are comprised of information indicating optimization and linking of such object files to create an executable output file. In response, it is noted that in Figure 4, all of the files (e.g. 206a, 404a, 408a and 210a) constitute object files according to the broadest reasonable interpretation. Further, the IPA/IPO phase extracts information indicating optimization, as noted in col. 8 lines 40-45, wherein "the compiler back end...can perform the appropriate level of optimization on each file because the IPA/IPO phase has access to the compilation options in each intermediate ".o" file." Compilation options constitute optimization information. Further, the object files are finally linked upon completion of the optimization phases, as noted in col. 10 lines 9-11. The rejection of claims 1-25 is proper and maintained.
